Product Designer II (UX/UI) with 2 years of experience at the intersection of design and hardware in wearables, handheld devices, and mobile. I translate complex user, sensor, and environmental data into experiences that feel simple, even when they're not.

EDUCATION

Carnegie Mellon University

Aug 2021 – May 2025

Bachelor of Design

Human-Computer Interaction

GPA: 3.85/4.00

Dean's List 2022, 2023, 2024

Pittsburgh, PA

SKILLS

Software

Figma

Adobe CC (Ai, Ps, Id, Ae, Lr)

EXPERIENCE

Product Designer II, Garmin International

May 2024 – Present | Olathe, KS

- Led UX and product strategy across **7 products** spanning hiking, golf, hunting, and cycling, understanding requirements, scope, and timeline, and advocated for prioritization of design improvements. **7 features** launched / planned by Q2 2027.
- Built **Figma and AI-assisted prototypes, flow diagrams, and hardware test rigs** that connected physical controls to Figma flows, enabling the evaluation of screen and tactile interactions with product managers, engineers, and cross-functional stakeholders.
- Defined interaction frameworks across **6 device form factors**, including 2- and 5-button watches, tabletop devices, 1-inch bow-mounted displays, and mobile/web mapping experiences.
- Drove cross-product consistency with **11 product teams**, aligning interaction patterns, behaviors, and terminology across the ecosystem, which reduced rework and improved handoff efficiency.
- Expanded research with **50+** internal testers through surveys, usability studies, discovery interviews, and customer acceptance reviews, then iterated designs based on findings.

Product Design Intern, Red House Communications

June 2023 – Aug. 2023 | Pittsburgh, PA

- Redesigned client websites in Figma, using stakeholder interviews to define **key user segments** and **map critical journeys**.
- Restructured information architecture and conversion flows to reduce friction across sign-ups, donations, and bookings, increasing site clicks by **25%** in the first month.

PROJECTS

Garmin Hunt App, New In-Field Tools, Outdoor Mapping

June 2026 - Present | Olathe, KS

- Designed in-field and planning tools for hunters across maps, weather, compass, and ranging, collaborated with map engineering to define MVP scope, reuse existing capabilities, and prioritize new development; validated concepts with **8 internal hunters**.

Garmin Approach S72 Watch, 2-button Golf Wearable, New Features

December 2025 – May 2026 | Olathe, KS

- Owned key features for Garmin's latest golf watch, including slope reading, predicted putt-break direction, and heart-rate visualization, defining when each surfaced during a round; achieved **96%** beta tester satisfaction.
