EXPERIENCE

Product Designer II, Garmin International

May 2024 – Present | Olathe, KS

- Leading end-to-end UX across mobile, web, wearable, and handheld devices for hiking, golf, hunting, and cycling verticals, collaborating cross-functionally with software engineers, product managers, and research.
- Facilitating weekly stakeholder reviews and prototype workshops in Figma to drive product direction, documenting decisions in Confluence and Jira while maintaining design consistency across 11 product teams.
- Building interactive physical prototypes combining Figma designs with hardware, synthesizing feedback from 50 testers, and with working engineers to balance usability with technical constraints.
- Defining interaction frameworks for touchscreen and physical button inputs across 7+ device form factors, ensuring every pattern scales across varying button configurations and screen sizes.

Product Design Intern, Red House Communications

June 2023 – Aug. 2023 | Pittsburgh, PA

- Redesigned client websites in Figma by conducting stakeholder interviews to identify key user types.
- Restructured information architecture to surface clear pathways to critical actions like sign-ups, donations, and bookings, increasing site usage by 25% in the first month.

PROJECTS

Garmin Explore Web + App, Outdoor Mapping + Navigation

March 2026 – Present | Olathe, KS

- Leading the 0-1 redesign of Garmin Explore, an outdoor mapping, navigation, planning and data management ecosystem, conducting competitive analysis and redesigning the end-to-end UX to reposition Explore as a competitive product in the market.

Garmin Hunt App, New In-Field Tools + Outdoor Mapping

June 2026 - Present | Olathe, KS

- Designing in-field tools for hunters, including map-integrated weather data, map layers, compass, and rangefinder features that support both planning and decision-making on the ground.
