**Product Designer II** specializing in UX and interaction design across wearables, handheld devices, mobile, and web. I turn complex user, sensor, and environmental data into clear interaction models and intuitive cross-device experiences.

---

## EDUCATION

**Carnegie Mellon University**
Aug 2021 – May 2025
*Bachelor of Design*
*Human-Computer Interaction*
GPA: 3.85/4.00
Dean's List 2022, 2023, 2024
Pittsburgh, PA

## SKILLS

**Design**
Interaction Design
UX Design
Information Architecture
User Flows
Prototyping
Design Systems
UX Research
Mobile UX
Device UX
Physical Prototyping

**Tools**
Figma
Adobe CC (Ai, Ps, Id, Ae, Lr)
Claude
Cursor
Glyphs 3
HTML/CSS
JavaScript
p5.js

## EXPERIENCE

**Product Designer II,** *Garmin International*
May 2024 – Present | Olathe, KS

- Led UX and interaction design across **7 products** spanning hiking, golf, hunting, and cycling, shaping flows, requirements, and feature behavior from early concepts through implementation; **9 features** launched or planned by Q2 2027.
- Built **Figma prototypes, flow diagrams, AI-assisted concepts**, and **hardware test rigs** to validate interaction models across physical controls and on-screen states.
- Defined interaction frameworks across **6 device form factors**, including 2- and 5-button watches, tabletop devices, 1-inch bow-mounted displays, and mobile/web mapping experiences.
- Partnered with **11 product teams** to align cross-product interaction patterns, behaviors, and terminology across Garmin's ecosystem.
- Conducted research with **50+ testers** through usability studies, interviews, surveys, and acceptance testing to refine flows and product behavior.

**Product Design Intern,** *Red House Communications*
June 2023 – Aug. 2023 | Pittsburgh, PA

- Redesigned client websites in Figma, using stakeholder interviews to define **key user segments** and **map critical journeys**.
- Restructured information architecture and conversion flows to reduce friction across sign-ups, donations, and bookings, increasing site clicks by **25%** in the first month.

## SELECTED WORK

**Garmin Alpha Hunt App,** *Mobile Mapping & In-Field Interaction Design*
June 2026 - Present | Olathe, KS

- Designed map, weather, compass, and ranging interactions for in-field and planning use, partnering with map engineering to define MVP behavior, reuse existing capabilities, and validate flows with **8 hunters**.

**Garmin Approach S72 Watch,** *Wearable Interaction & Data Visualization*
December 2025 – May 2026 | Olathe, KS

- Designed slope-reading, putt-break, and heart-rate interactions for Garmin's latest golf watch, defining when features surface, how they respond to hardware input, and how users recover from GPS/compass inaccuracies; achieved **96%** beta tester satisfaction.
